Delivering Integrated Project Controls

As an authorised Primavera partner, RPC has been helping clients to deliver their projects successfully since 1992.

RPC established its place in the industry providing Primavera P3 training courses. Thirty years on, we now offer the full end-to-end lifecycle for solutions based on the world-leading Oracle Primavera EPPM software products: licence provision, solution architecture, implementation, integration, hosting, training and support.

Our project controls solutions are underpinned by unrivalled industry expertise within our team and a unique collaborative way of working with clients to create a holistic environment in which programmes and projects are delivered on time and within budget.

Our Company

RPC is very proud to be 100% employee owned, since transitioning to this ownership model in 2023.

Employee ownership gives every member of our growing team an equal stake in the business, reinforcing and fostering the exemplary team ethos and high level of client satisfaction of which we were already very proud.

When you do business with RPC, you know that every member of the team cares. It's our company and it matters to each one of us that we deliver the right service for every different client.

You'll find us all striving to do better, generate new ways of working and develop innovative ideas that will help our company to grow. We think it sets us apart and our clients agree.

Our Clients

The ability to integrate powerful and customisable reporting tools with the world-leading Oracle Primavera project planning and scheduling software makes us the solution provider of choice for clients in a wide range of industry verticals, in both the public and private sectors.

Our clients range from blue chip organisations to SMEs. We have established a particular focus in the Construction and Engineering, and Aerospace and Defence sectors, where our innovative Managed Solutions built around Oracle's Primavera Unifier are transformative in helping our clients to ensure compliance with regulatory requirements in contract management, fund management and beyond.

Developing Skills

RPC supports the professional development of clients at all levels, with a full range of training courses in the Oracle Primavera toolset, and a suite of broader project management skills courses.

Our training is delivered as public or private courses, hosted at our training facility in Leeds, at a client's own location or online, via Microsoft Teams. We can also offer bespoke learning solutions and tailored course content for clients who require something different from the standard, scheduled course curriculum.

In addition we have a growing resource of flexible, on-demand e-Learning content for Oracle Primavera P6 and the Oracle Primavera Unifier solutions we support.

Through trusted partners, we also offer a range of Project Controls skills courses to complement our Oracle Primavera training, such as Risk Analysis, Forensic Delay Analysis and NEC4 training.

eLearning: at your own pace and your own place

Learn@RPC brings you a learner-led eLearning programme based on 30 years of Oracle Primavera P6 training experience. Gain in-depth instruction, video demonstrations, and exclusive bonus content – all with 12 months of access. Complete the course to earn CPD credits and a certification badge.

Learn@RPC offers a comprehensive eLearning platform designed to fit your learning style and schedule.
Whether you want to complete the full P6 Fundamentals course or focus on specific areas like Initiation, Planning, or Execution & Control, you have the flexibility to learn anytime, anywhere, on any device.

Bespoke training you can make your own

Looking for tailored training for your team? We also offer bespoke courses – hosted by us or on your own learning management system – customised to suit your team's needs and your organisation's branding if required. Get in touch to find out more about our enterprise offering.

Shaping Solutions

No two solutions are the same. Our team of implementation experts work with our clients to shape a project controls solution that meets their own unique requirements.

We have developed a suite of Oracle Primavera Unifier-based solutions for a number of project controls disciplines, including Contract Management for NEC4 and FIDIC, Earned Value, Risk Management and more. Created as modular solutions compatible with Unifier's Accelerator, these can be deployed out of the box or with minimal configuration to get you up and running with a powerful project controls platform solution within as little as 3 months.

We have an enviable reputation for our integration skills, both within the Oracle Primavera toolset and in linking Primavera P6 or Unifier with third-party products. We support clients through User Acceptance Testing to a successful launch cloud hosting for SaaS / PaaS and IaaS solutions and ongoing Primavera application support for clients throughout your deployment.
